

CS Mobile is an optional module to CS Time. It is a small web server that is linked to CS Time which allows your roaming employees to clock using a smart device.

This module is available on all levels of CS Time.

<b>The mobile interface</b> .....	<b>2</b>

## Setting up user access

The user's login and password is configured in the User Module.

1. Open the **Browse Employees** window .
2. Select the employee and click on **Change**. The Update Employee window will open.
3. Select the **Web** option and enter the login and password in the **Web Login** and **Web Password** fields.

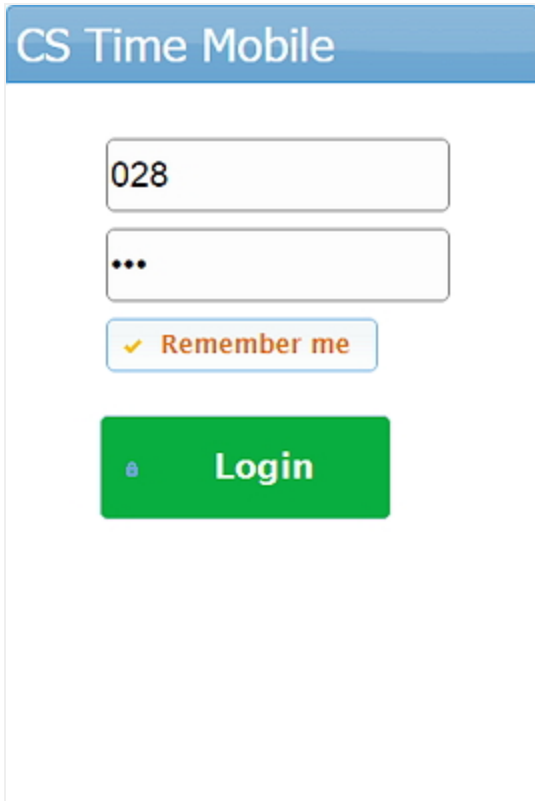

4. Click on **Ok** to save.

## The mobile interface

The interface can be accessed via a browser on a smart device.

Once the interface has loaded, the user must enter his/her login and password and select the **Login** button.

CS Time Mobile

028

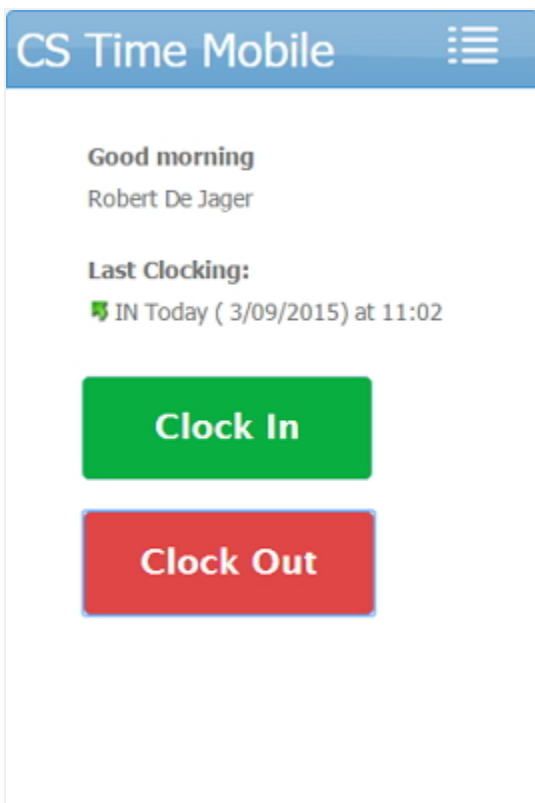

...

✓ Remember me

🔒 Login

The image shows a mobile login interface. At the top is a blue header with the text 'CS Time Mobile'. Below the header are two white input fields. The first field contains the number '028'. The second field contains three dots '...', indicating a masked password. Below the input fields is a button with a checkmark icon and the text 'Remember me'. At the bottom is a large green button with a lock icon and the text 'Login'.

The user's last clocking will be shown and he/she can clock in or out using the **Clock In** or **Clock Out** buttons.

CS Time Mobile

Good morning  
Robert De Jager

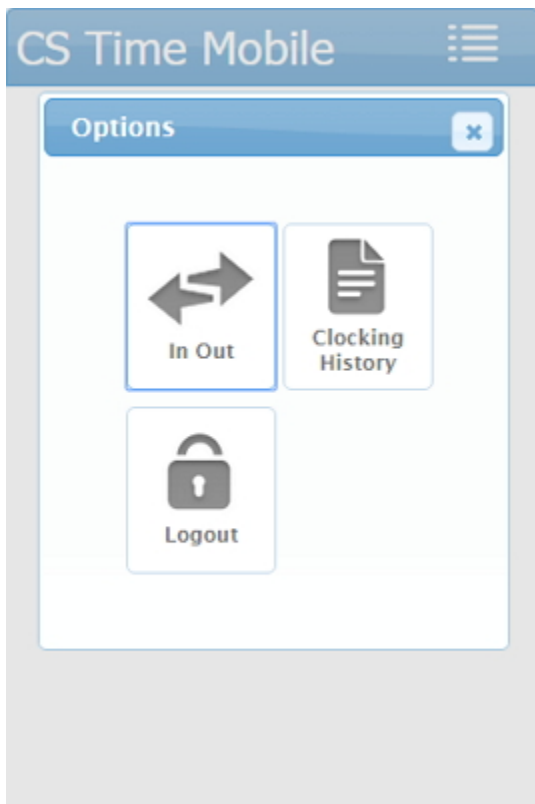

Last Clocking:  
🕒 IN Today ( 3/09/2015) at 11:02

Clock In

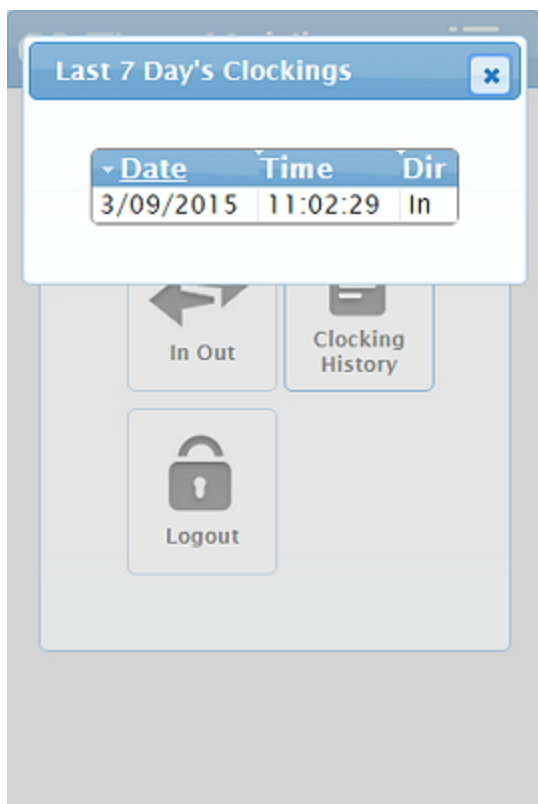

Clock Out

The image shows a mobile dashboard interface. At the top is a blue header with the text 'CS Time Mobile' and a hamburger menu icon. Below the header, the text 'Good morning' is followed by the name 'Robert De Jager'. Underneath, it says 'Last Clocking:' followed by a clock icon and the text 'IN Today ( 3/09/2015) at 11:02'. At the bottom are two large buttons: a green one labeled 'Clock In' and a red one labeled 'Clock Out'.

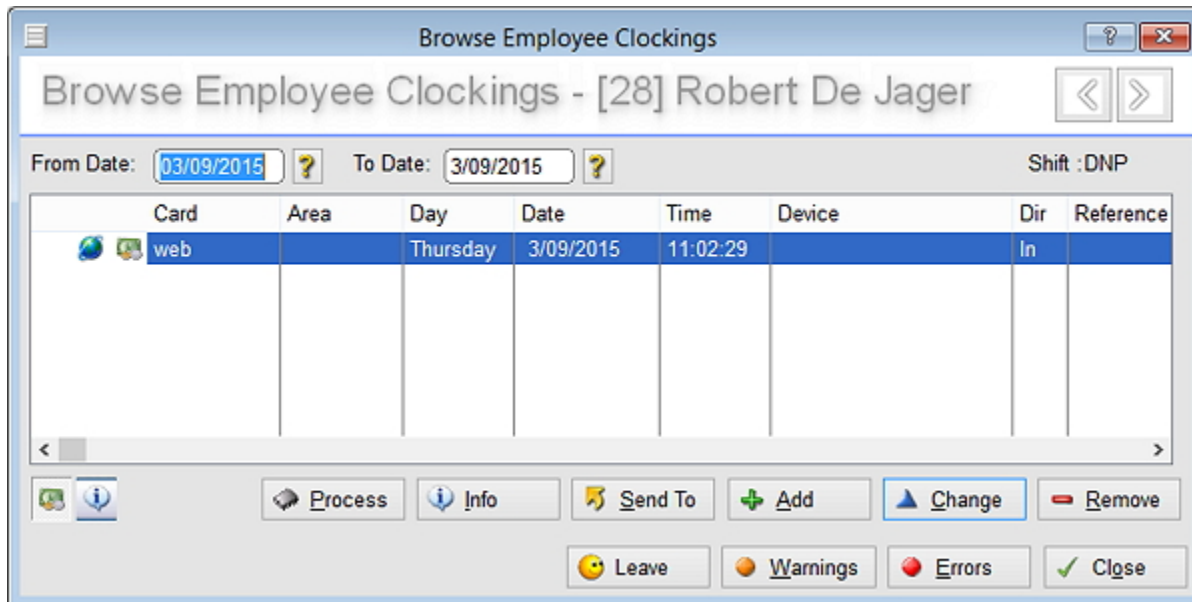

The mobile menu has the options to Logout or view your clocking history.

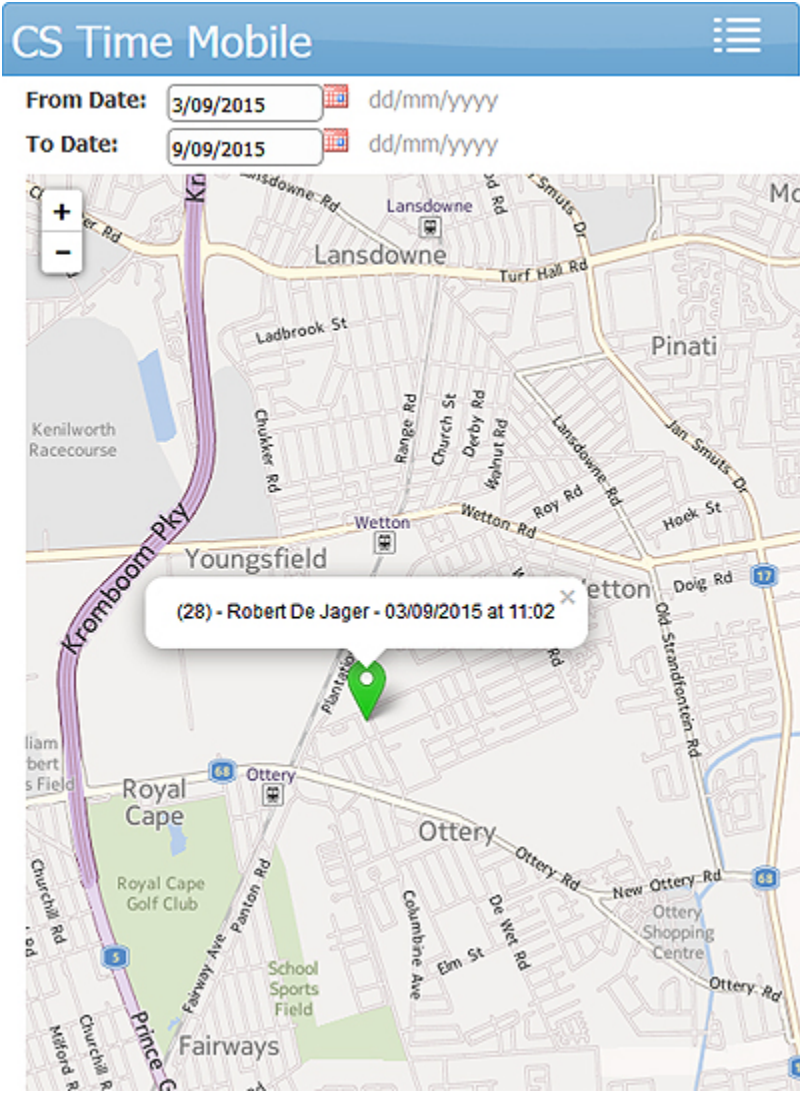

The clocking history for the last 7 days will be displayed on screen if the **Clocking History** option is selected.

Clockings done via the mobile interface will be saved as **web** clocking in CS Time.

The GPS co-ordinates of the mobile clockings are logged and can be viewed by the user. To view the clockings on the map for a specified date range, add /clockingsmap to the URL e.g. if the URL to access CS Mobile is <http://clock.mycompany.com>, change it to <http://clock.mycompany.com/clockingsmap>.
